

C.W.C. Stop Condense

Latex-based white coating (such as **C.W.C. Stop Condense**), formulated with special mineral powders, designed for indoor application on cold surfaces that cause condensation and mould formation, thus making façades warmer and eliminating the thermal bridge. Also formulated for coating pillars, reinforced concrete walls and non-insulated walls. Minimum required characteristics: Difference of temperature on concrete – Up to +5°C | +41°F; Film forming temperature +5°C | +41°F; Water vapour permeability coefficient $\mu=8$.
